Therapies of Tomorrow

Prof. Eran Elinav, M.D., Ph.D.,
Weizmann Institute, DKFZ

Host-microbiome interaction in health and disease

16/1/2023

16:30

Eran Elinav's research focuses on deciphering the molecular basis of **host-microbiome interactions** and their effects on health and disease, with a goal of **personalizing medicine and nutrition**.

Elinav discovered that people consuming identical foods and additives, such as non-nutritive sweeteners, feature a **unique glycemic response**. He also investigates mechanisms to harness the microbiome in **neurodegenerative diseases** and **acute liver failure**.

Join us

in the room **Y16G05**
and enjoy a following
apéro!

Or watch on Zoom:

Meeting ID: 691 8415 0450
Passcode: 16012023

A **dinner with the speaker** will be organized for a limited number of students.
Contact dominika.brchnelova@uzh.ch for details and tell us, why you'd like to attend!
